## {YEL!} JUNIOR CODING AND VIDEO GAMES WITH SCRATCH

Entering grades 2-5

STEM Video Game Enrichment for the 21st Century learner. Each {YEL!} Coding class follows four basic components: •Teach It!...Students learn different video game and storytelling design techniques (movement blocks, control blocks, basic animation, adding scores, etc.) •Code It!... Students use Scratch® to code their own story and video games. •Explore It!...Students can write their own story and video game code, experiment with it and test new options. Our collaborative learning environment encourages students to learn from each other. •Keep It!...Students keep their stories and video games online with Scratch® and can access it and expand upon it at anytime.

Scratch® is an MIT created and monitored, kid-safe web interface. It uses a drag and drop programming interface to teach students of all levels coding practices. Your child will receive a Scratch user name and password so they can access their projects from any computer at anytime. Scratch® is not affiliated with {YEL!} nor does it endorse this program.
